

*Executive Branch Update: April 15, 2010—*  
**Classification & Pay Study Committees**

**Operations, Maintenance & Support Services Bargaining Unit:** Final editing of the OM&S Pay Study report to the parties is taking a bit longer than expected due to some unanticipated but needed revisions. The group is still on track to complete and issue the report by May 1. Additional meetings may be necessary to meet that deadline, however.

**Professional & Technical Services Bargaining Unit:** The Pro Tech group continues to steam along performing Hay Guide Chart scores to their many classifications. Although one meeting this month had to be postponed due to illnesses, regular meetings with good progress are taking place.

**Supervisory Services Bargaining Unit:** The Supervisors have adopted the computer-driven techniques devised by the Pro tech group. It is expected that meetings that involve classification revising and Hay Guide Chart scoring will be even more efficient as a result.
